

Testosterone Cypionate is available in combination with either Dehydroepiandrosterone (DHEA) or Anastrozole

## What strengths are available?

These blends are available in 10ml size vials and are compounded using grapeseed oil

- Testosterone cypionate/DHEA 200mg/10mg per ml
- Testosterone cypionate/Anastrozole 200mg/1mg per ml
- Testosterone cypionate/Anastrozole 200mg/0.5mg per ml

## What is this medication?

- Testosterone is an anabolic steroid
- Anastrozole is an aromatase inhibitor, which stops the conversion of testosterone to estradiol
- DHEA is a hormone that may be given when you no longer produce enough on your own due to adrenal insufficiency.
- It may be used to reduce the symptoms of male hypogonadism (erectile dysfunction, infertility, decrease in beard and body hair growth, decrease in muscle mass, development of breast tissue, or loss of bone mass).
- It may also be used for other conditions as determined by your doctor

## How should I use this medicine?

Follow the instructions on your prescription label provided by the pharmacy and your prescriber. Your dosage is based on your medical condition and response to therapy.

This is given as a shot into the muscle or fatty part of the skin. Wash hands and sanitize the injection site with alcohol prior to administration. Do not use the solution if it becomes cloudy, has particles, or changes color. Do not use after the beyond use date, which is provided on the label. Dispose of used needles in a Sharps container.

## What if I miss a dose?

If you miss a dose take it as soon as possible. If it is almost time for your next dose, skip the missed dose and continue with your regular dosing schedule. Do not double the dose.

## What should I watch for while using this medicine?

Signs of an allergic reaction: hives blistering, swelling of the mouth, face, lips tongue throat, trouble breathing.

Signs of injection site reaction: redness or itching around the site the injection occurred.

## What side effects may I notice from receiving this medicine?

- Headache
- Acne
- Diarrhea
- Emotional instability
- Loss of strength and energy
- Trouble sleeping
- Changes in hair growth

## Where should I store my medication?

Store at room temperature between 20°C to 25°C. Protect from light.
