

GABAPENTIN COMPOUND

What is this medicine?

Gabapentin (GA-ba-pen-tin)

- Gabapentin is a GABA analog that may help address painful nerve diseases.
- It may also be used for other conditions as determined by your doctor.
- **Gabapentin may be a controlled substance in your state.**

Compounded Drug Forms: capsule, suppository, cream, gel

What should I tell my health care provider before I take this medicine?

- Allergy to gabapentin
- Pregnant or may become pregnant; are breastfeeding
- Have kidney disease
- Are on peritoneal dialysis, intermittent hemodialysis or continuous renal replacement therapy
- Have respiratory disease
- Have a history of alcohol use disorder or substance use disorder
- Are taking other sedating medications
- Have myasthenia gravis
- Have epilepsy

How should I use this medicine?

Follow the package directions provided by Belmar Pharma Solutions and by your prescriber. Your dosage is based on your medical condition and response to therapy. Follow the dosing schedule provided carefully.

Oral dosage forms may be taken with or without food. If it upsets your stomach take it with a small meal.

Topical products can be applied to the inner arm, upper thigh, back of the knee, tops of the feet and inner wrists. It is recommended to rotate sites to ensure even retention of the hormone. Cover treated skin with clothes to avoid contact with people or pets.

Vaginal preparations should be inserted using your finger or the applicator provided. Suppositories may leak and may be more convenient to use at bedtime.

What if I miss a dose?

- If you miss a dose, take it as soon as possible.
- If it is almost time for your next dose, skip the missed dose and continue with your regular dosing schedule.
- Do not take double the dose at once.

What should I watch for while using this medicine?

Belmar Pharma Solutions recommends yearly checkups with your provider that may include monitoring for renal function and behavioral changes.

What may interact with this medicine?

- Extensive drug interactions exist with this medication.
- Discuss your medication regimen with your health care provider to determine the best therapy for you.
