- Have irritated, raw, blistered, or broken skin in the treatment area
- Have swollen skin, numbness, or are not able to feel pain in the treatment area
- Have a bacterial infection in the treatment area
- Have tuberculous or fungal lesions of skin vaccinia, varicella, or acute herpes simplex
- Require treatment over a large area of the body
- Have liver disease
- Have a history of methemoglobinemia
- Have a glucose-6-phosphate (G6PD) deficiency
- Have familial malignant hyperthermia
- Have heart or lung disease
- Have pseudocholinesterase deficiency

How should I use this medicine?

Follow the package directions provided by Belmar Pharma Solutions and by your prescriber. Your dosage is based on your medical condition and response to therapy. Follow the dosing schedule provided carefully.

Oral dosage forms may be taken with or without food. If it upsets your stomach take it with a small meal.

Topical products can be applied to the inner arm, upper thigh, back of the knee, tops of the feet and inner wrists. It is recommended to rotate sites to ensure even retention of the hormone. Cover treated skin with clothes to avoid contact with people or pets.

Vaginal and rectal preparations should be inserted using your finger or the applicator provided. Suppositories may leak and may be more convenient to use at bedtime.

What if I miss a dose?

- If you miss a dose take it as soon as possible.
- If it is almost time for your next dose, skip the missed dose and continue with your regular dosing schedule.
- Do not take double the dose at once.

What should I watch for while using this medicine?

Belmar Pharma Solutions recommends yearly checkups with your provider and to monitor for signs of severe skin irritation or toxicity.

What side effects may I notice from receiving this medicine?
